

Phase-II

Data Flow Diagram & User Stories

Date	02 March 2026
Team ID	Team 154
Project Name	Insurance Fraud Detection using ML
Maximum Marks	4 Marks

Data Flow Diagrams

A Data Flow Diagram (DFD) Level 0, also known as a Context Diagram, provides a high-level overview of a system by representing it as a single central process. It defines the system's boundaries by illustrating the interactions between the system and external entities, such as users, external databases, or other third-party services. This diagram focuses on the primary data flows entering and leaving the system without detailing internal sub-processes, making it an ideal tool for establishing project scope and visualizing the system's relationship with its external environment.

User Stories

Use the below table to list the user stories for your deployed web product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Investigator	Data Input	USN-1	As an investigator, I want to input all relevant accident and policy details into a single web form.	I can see a clean HTML form with all required 24 fields available for input.	High	Sprint-1
Investigator	Prediction	USN-2	As an investigator, I want to click a "Predict" button to automatically analyze the inputted claim.	The application successfully sends my data to the ML model without crashing.	High	Sprint-1
Investigator	Result Display	USN-3	As an investigator, I want the system to clearly display whether the claim is	The UI updates to show a clear text result based on the model's output.	High	Sprint-1

			"Fraud" or "Legal".			
Investigator	Error Handling	USN-4	As an investigator, I want to be warned if I forget to fill in a required field.	The form prevents submission and highlights missing fields in red.	Medium	Sprint-2
Data Admin	Model Integration	USN-5	As an admin, I want the web app to easily load the latest .joblib model so I can update the system without rewriting the website.	app.py successfully loads best_model.joblib on startup.	High	Sprint-1
